

Jeremy Dowdy

Prosper, TX | [linkedin.com/in/jeremy-dowdy](https://www.linkedin.com/in/jeremy-dowdy) | Jeremydowdy76@gmail.com

Professional Summary

Highly technical, velocity-driven Data Scientist and Analytics Engineer with a Master's in Advanced Data Analytics and 7+ years of progressive data platform experience at HOLT CAT. Specializes in enterprise data lakehouses, high-throughput ETL/ELT pipelines, predictive machine learning systems, automated pricing systems, and AI-assisted development workflows.

Technical Skills

Languages & Frameworks: Python, Pandas, NumPy, Scikit-Learn, SQL, dbt, R, Excel

Data Platforms: Microsoft Fabric, Snowflake, Azure, Lakehouse Architecture, Medallion Layering

BI & Engineering: Power BI, DAX, advanced semantic modeling, Tableau, Alteryx ETL automation

DevOps & AI: Azure DevOps, CI/CD, Git/GitHub, Antigravity, Cursor, LLM agent workflows

Professional Experience

HOLT CAT - Data Scientist | Sep 2025 - Present | Dallas, TX (Remote)

- Architected and deployed an internal market-based pricing application for commercial machinery rate analysis and margin optimization.
- Spearheads Project Galaxy, migrating legacy Snowflake, dbt, and Tableau footprints into a unified Microsoft Fabric Lakehouse.
- Productionized regression, classification, and K-Means clustering systems for logistics bottlenecks and fleet distribution optimization.
- Introduced AI-first development workflows with Cursor and LLM agents, accelerating refactoring and pipeline delivery by 35%+

HOLT CAT - Data Analyst 3 | Mar 2023 - Oct 2025 | Irving, TX

- Engineered Azure and Snowflake ETL/ELT workflows and optimized warehouse indexing to reduce ingestion latency by 25%.
- Audited warehouse cost drivers and identified redundant compute clusters and unoptimized query overhead.
- Built Alteryx workflows for operational asset health metrics, cutting manual reporting by 40%.
- Partnered with senior executives to translate ambiguous commercial problems into technical requirements.

HOLT CAT - Data Analyst 2 | May 2019 - Mar 2023 | Irving, TX

- Managed enterprise Power BI and Tableau dashboard suites across billions of industrial transaction and telemetry records.
- Delivered insight reports used for annual budget restructuring and regional operating decisions.

Fan Cloth - Sales Executive | Nov 2014 - Jan 2019

- Managed regional accounts, revenue targets, pipeline analysis, forecasting metrics, and logistics coordination.
- Built the business and operational foundation for a transition into analytics and engineering functions.

Key Projects

Automated Cost Auditing & Profitability Platform: Supabase, Vercel, Python, Computer Vision AI, PostgreSQL. Built an internal web application for OCR-assisted receipt capture, inventory cost auditing, and near-real-time profit margin analysis.

Agentic Personal Finance & Wealth Engine: Python, LLM orchestration, multi-agent workflows. Built autonomous routines to categorize transactions, reconcile accounts, forecast cash flow, and audit recurring expenses.

Education & Certifications

University of North Texas - Master of Science in Advanced Data Analytics, 2018 - 2019

East Texas A&M; University - Bachelor of Science in Sports Management, 2010 - 2014

Microsoft Certified: Fabric Analytics Engineer Associate (DP-600)

Active participant in the dbt Global Community; attended Microsoft Fabric Community Conference (FabCon), 2026.
